I. PURPOSE

A 2017 study by the University of California San Francisco (UCSF) Healthforce Center found that California will need almost 9,000 additional primary care clinicians by 2030 to meet demand, and about 40% of those will be needed in Los Angeles, Orange, and the Inland Empire regions. For medical providers that serve a growing Medi-Cal population, this gap could be even more acute because safety net providers have fewer resources to recruit physicians.

In response to the looming physician shortage, L.A. Care Health Plan (L.A. Care), in partnership with Uncommon Good (Program Administrator), is pleased to release a Request for Applications (RFA) under the *Elevating the Safety Net Physician Loan Repayment Program*. *Elevating the Safety Net* is a long-term initiative to recruit highly qualified physicians into the Los Angeles County safety net for the first time. The Physician Loan Repayment Program will provide loan repayments of up to \$5,000 per month for 36 months, with an opportunity to extend for an additional two (2) years. Eligible primary care specialties include Family Medicine, Internal Medicine, Pediatrics, and Obstetrics/Gynecology.
