January 1, 2016 - December 31, 2016

L.A. Care's Provider and Hospital Networks: A Positive Member Experience For You

L.A. Care
Covered™

How Do We Select Our Providers and Hospitals to Ensure You Have a Positive Member Experience?

Network Design Criteria for Practitioners

The provider network for L.A. Care *Covered*™ and L.A. Care *Covered Direct*™ is designed on specific criteria that determine the selection of the Participating Physician Groups (PPGs) and their associated physicians across multiple specialties, including:

1. Allergy
2. Cardiology
3. Ophthalmology
4. Gastroenterology
5. General surgery
6. Nephrology
7. Neurology
8. Obstetrics and Gynecology
9. Orthopedics
10. Pulmonology
11. Urology

Additional specialists are included in our network if they meet our credentialing requirements. This helps ensure members have access to a larger number of practitioners and types of clinicians needed within a reasonable distance from their home address (defined as a 15-mile radius or 30-minute driving time).

For primary care groups and associated physicians, we include only those that meet minimum standards in the following clinical quality measures:

Clinical Quality Measures

Preventive Services

- **Cervical cancer screening rate:** The percentage of patients who are eligible for a yearly Pap test and receive a yearly Pap test. Cervical cancer screening means checking a woman's cervix for cancer before there are signs or symptoms of the disease.
- **Breast cancer screening rate:** The percentage of patients who are eligible for a yearly mammogram and receive a yearly mammogram. Breast cancer screening improves earlier discovery of the disease while it is more treatable and has not spread.
- **Chlamydia screening rate:** The percentage of women 16–24 years of age who were identified as sexually active and who had at least one test for chlamydia during the measurement year. Chlamydia screening can catch infections early and prevent serious complications, such as PID and infertility.
- **Childhood immunizations:** The percentage of children who received all required immunizations by age 2. Immunizations (vaccines) protect children from diseases such as measles, polio, and tetanus.

Chronic Care

- **Comprehensive diabetes care:** The percentage of members 18–75 years of age with diabetes (type 1 and type 2) who had A1C testing, retinal eye exam, medical attention for nephropathy, and blood pressure control. Comprehensive diabetes care increases patient satisfaction, better quality of life, and improved health outcomes.
- **Use of appropriate medications for members with asthma:** The percentage of members 5–64 years of age who were identified with persistent asthma and who were appropriately prescribed medication. An appropriate asthma treatment plan gives members guidance on taking their medications properly, avoiding asthma triggers and seeking care when needed.

Prenatal and Postpartum Care

- **Prenatal and Postpartum Care:** The percentage of deliveries of live births during the measurement year.
- **Timeliness of Prenatal Care:** The percentage of mothers who received a prenatal care visit in the first trimester or within 42 days of enrollment in the organization as a member of the PPG. Timely and frequent prenatal care visits allow health concerns to be detected and treated early.
- **Postpartum Care:** The percentage of mothers who had a postpartum visit on or between 21 and 56 days after delivery. Postpartum care ensures that new mothers are healthy, capable of taking care of their newborn children, and equipped with all the information they need about breastfeeding, reproductive health and contraception.

Specialists in the 11 areas listed above are also evaluated on member experience measures.

Member Experience Measures

- **Getting timely appointments, care and information:** The timely scheduling of member appointments to receive care, and how timely member questions are answered when they contact the provider's office.
- **Grievance and Appeals:** The grievance and appeals rate per thousand members per year. Lower grievances and appeals rates generally mean higher member satisfaction.

The measures used in our evaluation are nationally recognized measures developed and approved by the National Committee for Quality Assurance and the National Quality Forum.

Network Design Criteria for Hospitals

The hospitals in the L.A. Care Covered™ and L.A. Care Covered Direct™ hospital network are chosen based on three important member needs:

Member Needs

- **Proximity:** Hospitals located within a 15-mile radius of the member's home address.
- **Admitting Privileges:** Hospitals where physicians who care for L.A. Care Covered members have admitting privileges.
- **High Quality Care:** Hospitals identified as Centers of Excellence.
 - Centers of Excellence have a reputation for providing high quality care.

L.A. Care does not use quality measures, member experience measures, patient safety measures or cost-related measures to select hospitals.

To verify a doctor's address, call L.A. Care Health Plan at 1-888-839-9909.

Para verificar la dirección de un doctor, por favor llame a L.A. Care Health Plan al número de teléfono 1-888-839-9909.

Remember: Be sure to clearly print the doctor's name and I.D. number on your enrollment form.

Recuerde: asegúrese de escribir el nombre del doctor y número de identificación claramente en su forma de inscripción.
